## PROJECTS:

i-BID (FYP) - Flutter Native Application

🔧 Here we organize a live auction in which locals participate in by just registering themselves in an application.

🔧 Platform used Visual studio code and language (Dart).

🔧 Escrow payment method is used to make the payment more secure.

🔧 Firestore Database used.

E-patient Android application

🔧 Here patients, pharmacists and doctors meet on a single platform by registering themselves.

🔧 It mainly gives patient great ease so that by sitting at home they consult with doctor and get the feedback from and the same time by picking up the nearest pharmacy they order medicines as well which doctor prescribed.

🔧 Firebase database used.

Voting System Android application

🔧 Here people register for the particular area and vote for the right person.

🔧 Admin going to end up with the results either who win or lose.
